

SOLTIX

WHITEPAPER & ROADMAP

A mining game where rewards are backed by real revenue.

01 · PURPOSE

Why Soltix exists

Most GameFi projects pay players by printing tokens until the economy collapses. Soltix takes a different path: the game earns real advertising revenue, a transparent share of that revenue flows into on-chain liquidity, and players earn from a pool that grows with actual platform activity.

Revenue-backed rewards

Google Ads income — not inflation — feeds the liquidity that supports player rewards.

Sustainable by design

Repairs, boosts and item burns sink tokens back into the pool so emissions stay in balance.

Transparent by default

Revenue reports, liquidity deposits and airdrop rules are published so anyone can check them.

Non-custodial

Your wallet, your keys. Soltix never asks for seed phrases or holds player funds.

02 · ECONOMY

Real revenue in, real rewards out

01

Ads

Ad placements across Soltix earn daily revenue.

02

Buybacks & liquidity

100% of ad revenue goes to \$SOLTIX buybacks and liquidity support.

03

Rewards

Active miners earn from the 40% Mining Rewards allocation through daily play.

04

Sinks

Repairs, crafting and syndicates burn tokens or route them to liquidity.

Spent in-game tokens (repairs, boosts and burns) flow back into the reward pool, while a published share of advertising income is added as liquidity. Every revenue report and liquidity deposit will be published with on-chain transaction links.

03 · TOKEN

\$SOLTIX token principles

\$SOLTIX (planned)

The planned on-chain token of the Soltix world. Today players earn SLTX, an off-chain in-game credit.

Utility first

Planned uses: upgrades, repairs and boosts, seasonal rewards and liquidity pairing.

No promised returns

Rewards depend on real platform revenue. Soltix does not promise fixed APYs or profits.

Fixed 100M supply

40% mining rewards, 20% DEX liquidity, 15% presale, 10% airdrop, 10% team (locked & vested), 5% marketing. Vesting and presale terms are published and contracts audited before launch.

04 · AIRDROP

Soltix Airdrop Points (SAP)

Points are awarded on the server for real activity. Your estimated share equals your points divided by all points issued, multiplied by the airdrop pool: 10% of the fixed 100,000,000 \$SOLTIX supply (10,000,000 tokens).

Dig in the Mines	Per dig · one dig every 4 hours	+4 SAP
Daily check-in	Once per day	+5 SAP
Stay active on Soltix	Per 30 active minutes, up to 16 per day	+1 SAP
Repair your pickaxe	First 3 repairs each day	+3 SAP
Shop purchase	Per 1 SLTX spent	+8 SAP
Join the whitelist	One time	+10 SAP
Invite an active friend	When your friend completes 6 digs	+50 SAP
Join with an invite	After your first 6 digs	+20 SAP

05 · WHITELIST

Tiers & requirements

The whitelist rewards real players. Your tier is set by your Soltix Airdrop Points at the time of the snapshot, and only wallets verified with a signature are included.

TIER 3**Early Miner****100+ SAP**

Whitelist access

TIER 2**Core Miner****500+ SAP**

Priority access & larger allocation

TIER 1**Founding Miner****2,000+ SAP**

First access & founding badge

Requirements

- Reach at least 100 Soltix Airdrop Points (SAP).
- Register a Solana wallet you control. Ownership is verified with a wallet signature before the snapshot.
- One account per person. Multi-accounting or bot activity removes eligibility.

HOW TO PARTICIPATE

Four steps to the snapshot

1

Sign in and start mining

Every new miner receives a Starter Pickaxe. Dig daily to earn SLTX and Airdrop Points.

2

Keep your streak alive

Daily check-ins add points and raise your mining efficiency day after day.

3

Register your wallet

Add your public Solana address on the Purpose page. Never share your seed phrase.

4

Verify before the snapshot

Sign a message with your wallet once wallet sign-in launches to confirm ownership.

STAY SAFE

The Soltix team will never DM you, ask for your seed phrase or ask you to send funds to verify a wallet. Only use soltix.world.

06 · MASTER ROADMAP

From local infrastructure to a Gaming DAO

Timing is indicative. Mainnet steps happen only after an independent audit.

Phase 1

Q4 2026

Infrastructure & Local Staging

IN PROGRESS

A secure, fully tested platform and the core game loop, built and verified locally before anything touches mainnet.

- Secure backend, secrets management & audit hardening
- Mines with random drops, durability & repair
- NFT-ready marketplace & gallery
- Anchor programs deployed to Devnet
- Wallet-only sign-in (Sign-In With Solana)
- Airdrop points, referrals, whitelist & leaderboards
- Vesting 2.0 engine (Lock Points)

Phase 2

Jan – Mar 2027

Token Generation & Early Community (Zealy)

PLANNED

The Early Contributor Airdrop on Zealy, whitelist and presale — then token generation, only after an independent audit.

- Early Contributor Airdrop & Zealy campaign
- Independent smart contract audit
- \$SOLTIX token generation (subject to audit)
- Whitelist registration & countdown — Jan 5, 2027
- Presale — Feb 3 to Feb 6, 2027
- Vesting 2.0 first claim — Mar 6, 2027

Phase 3

2027

Autonomous Liquidity & In-House Swap

PLANNED

A closed-loop economy: ad revenue and in-game sinks feed liquidity automatically, and players swap inside Soltix.

- Liquidity pool seeded from ad revenue
- In-house swap between in-game credits and \$SOLTIX
- Automatic sink split: burn, liquidity & rewards
- Public monthly treasury reports

Phase 4

2027 – 2028

Weekly Wipe MMORPG Mechanics

PLANNED

Seasonal MMORPG play: the world resets every week, so new and veteran players compete on a level field.

- Weekly world wipes with persistent cosmetics
- New mines, biomes & Meshy AI 3D gear
- Crews (guilds) & weekly crew leaderboards
- Event skins minted as NFTs to verified wallets

Ultimate

Long term

Soltix Gaming DAO

PLANNED

Decentralized governance and a community treasury: the players who build Soltix decide where it goes next.

- On-chain governance & proposals
- Player-voted economy parameters & content
- Community treasury

IMPORTANT NOTICE

This document describes a project under active development. Plans, timelines and token details may change. Nothing here is financial advice or an offer to sell securities. Digital assets are volatile; in-game rewards and airdrop allocations are estimates and are not guaranteed. Only participate with funds you can afford to lose.
